

**Mount Lofty Districts Historical Society Inc.**

**“Why Cities Need Nature”  
With  
Professor Chris Daniels**

**Friday 23rd September, 7:00 for 7:30pm**

This talk will take a look at the role played by trees and gardens in creating sustainable communities by using the environmental history of Adelaide as a case study. It explores the role of the green infrastructure in creating value in terms of environmental control, and also in creating a sense of place. Our environment also adds value by providing historical and cultural context for our community, and is an important refuge for biodiversity. However, the quality of our urban habitat is under threat. The focus of this talk is how we respond to determined bids to remove nature from the city and why it is important to respond to such threats to our environment.

**Professor Chris Daniels**

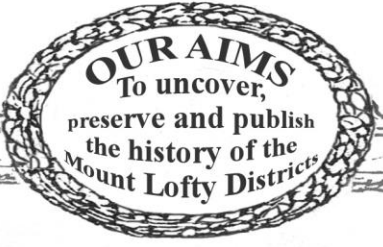

**Coventry Library, Stirling**  
63 Mount Barker Rd Stirling, SA

**Entry \$10**

Drinks and Nibbles will be provided  
To assist with catering, please RSVP
